

Data Flow Diagram

Date	10 July 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Data Flow Diagram:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example:

Data Flow Diagram (DFD) – OptiCrop

Smart Agricultural Production Optimization Engine

User Stories:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Farmer	Crop Prediction	USN-1	As a farmer, I want to enter soil and environmental parameters so that I can receive a suitable crop recommendation.	Recommendation is displayed successfully.	High	Sprint-1
Farmer	Input Validation	USN-2	As a farmer, I want the system to validate my inputs so that I avoid invalid predictions.	Invalid inputs show error messages.	High	Sprint-1
Farmer	Prediction	USN-3	As a farmer, I want the system to predict the best crop using AI.	Prediction is generated using the trained ML model.	High	Sprint-1
Farmer	Results	USN-4	As a farmer, I want to view the recommended crop instantly.	Crop name is displayed within a few seconds.	High	Sprint-1
Administrator	Model Management	USN-5	As an administrator, I want to update the trained model when new data is available.	New model replaces the previous model successfully.	Medium	Sprint-2
